Hymax Service Information

When you require service from any Hymax Service Centre, please ensure that you supply as much information as possible along with your query or request.
If you provide accurate details about a problem, this will enable the Hymax Service Centre to rectify the problem in the shortest time possible. With your assistance, problems can often be rectified over the telephone in an even shorter time.
Certain Hymax Service Centres may require a faxed request for service. Faxing is a convenient way of requesting help if you provide full details of your request as the information is accurate and guaranteed to go to the correct person.

**HANDS FREE OPERATION**

All Terminals can operate handsfree.

For handsfree operation, the Speaker and Microphone will automatically turn on, when you press the **MIC** key, if the handset has not been lifted. **To activate handsfree operation during a call, press the MIC key and replace the handset.**

To end handsfree operation simply lift the handset and continue the conversation or press **RLS** to terminate the call.

Handsfree operation is not available for Paging and Intrude (Outside Line or Extension).

To turn the microphone on and off during handsfree mode, press the **MIC** key.

**AUTOMATIC TRUNK SELECTION**

If an Outside Line has not already been accessed for Redial and Speed Dial, the system will access an Outside Line automatically.

**DSS or DIRECT STATION SELECTION**

The **DSS** is the panel on the Terminal which has 24 Keys that can be programmed for Exchange Lines, Extensions or Speed Dial numbers.

**WARNING TONE**

When activated, a tone will be received at programmed intervals while talking on an Outside Line to remind caller of call length.
